On Thursday 19 October 2023 from 5 to 9 p.m., *Via della Sapienza*, solo exhibition of the artist Fiorella Rizzo, will open at the Sant'Ivo complex (Corso del Rinascimento 40). The initiative is the result of the collaboration between the Archivio di Stato di Roma and Studio Stefania Miscetti. During the opening there will be a **performative intervention by Alessandra Vanzi from an idea by Fiorella Rizzo**.

The project, made up in of works never presented before, is inextricably linked to the place where it is hosted. The title, in fact, alludes to one of the previous names of the current Corso del Rinascimento, namely Via della Sapienza, attributed to it in 1431 when the university of the same name moved to this location. The metaphorical reinterpretation of this historical datum led the artist to reflect on the possibility of bringing Via della Sapienza to light through *the fiction of art*, and at the same time to give form through her works to a road to wisdom: a sapiential path that reveals itself in the loggia and the Sala Alessandrina of the Sant'Ivo complex and inhabits them, establishing an active dialogue not only with the architectural space but also with the archival and documentary heritage it preserves.

The meeting and fruitful collaboration with the Rome State Archive, in particular with Director Michele Di Sivo, led to the realisation of the works *Manoscritti* and *Lingue*, presented in close connection with precious documents from the Archive from the 16th to the 20th century: the autograph notebook of Bellezza Orsini accused of witchcraft in 1528, the extreme statement of Giordano Bruno before his execution at the stake in Campo di Fiori in 1600, the last words of Francesco Borromini in 1667, the oversized telegram on Umberto Nobile's expedition to the North Pole in 1928 up to the Memoir written by Aldo Moro during his kidnapping by the Brigate Rosse in 1978. Exceptional mementos that, together with the installations – *Campane*, *Lapidario* and *Convito* – invite the observers to question themselves on the concept of wisdom, its essence and how to pursue it.

Fiorella Rizzo's *Via della Sapienza* is therefore both a real and a symbolic place, a site-specific project that shows all the awareness and acuity of an artist who, as protagonist of the Italian and international art scene since the 1970s, continues her experiments with multiple media – sculpture, video, photography, drawings – in constant tension between research and attention to matter and philosophical matrix.
